

If you're in the cow calf business you need to keep the factory going. Make sure you keep the best cows producing at your ranch and replace those that cannot survive the drought with quality replacements.

We've decreased the number of replacement heifers we have available for sale this year, but we did not decrease the quality.

We're offering 140 head of top quality range ready females for you to pick from. 50 Black and Black white faced, 90 red and red white faced, (a big majority are solid red) These heifers were ultrasounded on August 7th to confirm the breeding date. All the information we have on these heifers will be made available to the purchaser. *You won't be disappointed in this group of heifers. They are long, thick and will make a good set of mother cows.*

We will again be featuring a group of red bred Heifers at the Bieber Fever XIII Red Angus sale on November 9, 2017. The heifers will remain at our ranch in Bismarck but will be on DV Auction during the Bieber sale. The top bidder will be given choice pick.

Except for the heifers that will be marketed at the Bieber Fever Sale, all heifers will be sold private treaty. Contact Wade or Lynn Moser for more information.

MOSER
REPLACEMENTS

The **DROUGHT** in the upper great plains has **FORCED** us to make some decisions about our cow herd:

- * *Do I buy feed?*
- * *Do I sell calves early?*
- * *Do I turn my cash crops into grazing?*
- * *Is my crop safe for grazing?*
- * *Do I sell cows?*
Poorer producers and older cows?
- * *Do I replace some of those culls with*
MOSER REPLACEMENTS?
