# Exercise your right to **CHOOSE!**

"The message for cow-calf producers is to hold onto the cows if possible," Hurt said. "The short-term losses of the next 12 to 14 months will be replaced by large profits in late-2013, 2014 and 2015."  
-Chris Hurt, Drovers Cattle Network - August 2012

We are offering 600 range-ready females bred to fit the needs of today's cattleman. Besides being stout, maternal and performance-minded replacements, these heifers have been ultrasounded in order to pinpoint their calving dates and, in most cases, identify the sex of their calves. Take this opportunity to shorten your calving season and eliminate the guesswork of the resulting calf crop. All breeding information will be provided for you.

These top-quality performance heifers are source-verified, coming from proven programs, and will give you the genetic advantage to raise market-topping calves.

You have heard that this years election will be the biggest decision in your lifetime.

In your cowherd, selecting your replacement heifers will be the biggest decision you make in preparing yourself for the cattle market ahead.
