**HEALTH PROGRAM:** One Shot, Cattlemaster, Seven Way, Dectomax, Preg Guard Gold, Bangs Vaccinated

**WEIGHT RANGE:** 900-1,100lbs **AI DATES:** May 20-24 **PASTURE BRED:** May 25 - July 11

**ULTRASOUNDED:** Data will be provided to buyers

"The message for cow-calf producers is to hold onto the cows if possible. The short term losses of the next 12 to 14 months will be replaced by large profits in late 2013, 2014, and 2015," said Chris Hurt of Drovers Cattle Network in August of 2012. I printed that quote in my 2012 brochure because I felt the same way. Now I think this trend may last longer than 2015. Our numbers, beef demand and conditions are in place for the cow-calf industry to be in great shape for many more years!

*...the next generation has arrived!*

We are offering 340 range-ready females. 175 Black and black white faced, 165 red and red white faced. These heifers have been ultrasounded in order to pinpoint their calving dates and, in most cases, identify the sex of their calves. Take this opportunity to shorten your calving season and eliminate the guesswork of the resulting calf crop. All breeding information will be provided for you. This will help in your selection along with having the breeding information during calving so you can concentrate more on those that are due based on the breeding date. These top-quality performance heifers are source-verified, coming from proven programs, and will give you the genetic advantage to raise market-topping calves.
